

## The following are the indications for referral to EPU.

1: Women with a positive pregnancy test and bleeding/brown discharge and NO pain.

(Women experiencing pain or pain and bleeding should be referred to the Emergency Room).

2: Women with a positive pregnancy test and an Intra Uterine Device in situ.

3: Women who have attended another scan provider and have been diagnosed with no fetal heart beat or a pregnancy of unknown location.

4: Women with a history of

- Ectopic pregnancy
- Tubal Surgery
- Previous Molar Pregnancy
- 2 or more previous miscarriages

With no pain or bleeding should contact EPU as early as possible to be offered a reassurance scan in our Friday afternoon clinic at approximately 7-8 weeks. Ph. 01- 8176846
