Re: Introduction of Ammonia Assay in house

Date: 19/07/24

Hi all,

We have introduced the Ammonia assay in house on the Roche analyser and it will be available from Monday 22nd July

The sample requirements have changed so please be aware:

- The sample type is EDTA (Red lid neonates, purple top adults).
- Analysis is available 24/7.
- The sample should be sent to the lab immediately as it is very labile.
- If not delivered to the lab within 5-10 minutes the sample must be put on ice.
- Please deliver sample to the Biochemistry lab during routine hours and hand to the on call scientist outside of routine hours.
- Expected turnaround time is 1 hr from receipt in the Biochemistry lab.

If you have, any questions feel free to contact me

Kind regards

Gráinne Kelleher
